Krypto Hikma AI - Whitepaper

1. Executive Summary

Krypto Hikma AI is an innovative AI-powered decision-making platform dedicated to the cryptocurrency market. Facing the complexity and volatility of cryptos, our solution offers investors a powerful tool that analyzes trends, news, and overall sentiment in real-time to guide investment decisions.

The Krypto Hikma AI token will be launched with a limited total supply. A portion of the platform's revenue will be systematically reinvested monthly to buy the token, creating a positive dynamic to support its long-term value.

2. Problem and Solution

Problem:

Crypto investors are often overwhelmed by information overload, fake news, and a lack of reliable tools that synthesize data into clear recommendations. This makes decision-making complex and risky, especially for beginners.

Solution:

Krypto Hikma AI offers an integrated platform:

- AI analysis of market trends
- Automated scraping and filtering of relevant news
- Personalized recommendations of the most promising cryptocurrencies based on research and overall sentiment
- Revenue reinvestment mechanism to strengthen token value

3. Technology

- Decision AI: Machine learning and Natural Language Processing (NLP) algorithms to analyze texts and trends.
- Secure Scraping: Automated collection of reliable data from top crypto sources.
- Blockchain: ERC-20 token (or other technical choice) with secure smart contracts.
- User Interface: Intuitive, responsive web app providing real-time recommendations.

4. Tokenomics

Total Supply: 100 million Krypto Hikma AI tokens

Krypto Hikma AI - Whitepaper

Allocation:

- 40% Public sale

- 20% Team and development

- 15% Marketing and partnerships

- 15% Reserves

- 10% Community rewards and staking

Token Utility:

- Access to premium platform features

- Staking with rewards

- Future decentralized governance

Revenue Reinvestment Mechanism:

60% of the monthly revenue generated by the decision-making platform will be used to buy tokens on the open market, reducing circulating supply and supporting value.

5. Roadmap

Phase	Description	Estimated Date
Phase 1	Deployment of the AI decision-making platform	Q2 2025
Phase 2	Integration of news scraping related to cryptocurrencies	Q3 2025
Phase 3	Token launch	Q3 2025
Phase 4	Implementation of revenue reinvestment mechanism	Q4 2025
Phase 5	Addition of AI to identify the most interesting cryptocurrencies based on internet research	Q1 2026

6. Platform Revenue & Token Buyback

The revenue generated by the Krypto Hikma AI platform will be reinvested to support the token's growth. At least 60% of the monthly revenue will be dedicated to buying tokens from the open market, ensuring continuous demand and value appreciation.
